Bibliography of the HARP–CDP group

This is the list[1] of documents that describe or evaluate the detector calibration and physics analysis work of the HARP–CDP group.

The documents are grouped as follows:

1. Publications in Journals
2. 'Comments' on, and 'Rebuttals' to, publications by the HARP Collaboration
3. Conference reports and seminar talks
4. Reports to the CERN–SPSC
5. HARP memos
6. HARP analysis notes
7. HARP–CDP reports
8. Documents on the HARP schism
9. External reviews
10. Excerpts on HARP from minutes of the CERN–SPSC and the CERN–RB

8 The HARP schism

The developments that led to the establishment of the HARP–CDP group and its independent line of publications, are documented in two short papers available at
http://cern.ch/harp-cdp/StateofHARP.150106.pdf
and
http://cern.ch/harp-cdp/WhiteWash.pdf

9 External reviews

With a view to clarifying the scientific aspects of the dispute between the HARP–CDP group and the HARP Collaboration, the experiment's two major funding agencies CERN and INFN requested in November 2006 a scientific evaluation by an independent committee of five senior physicists ('RBH' or 'Review Board for HARP' or 'Foà Committee').

The final report of this committee was issued on 1 March 2007 and is available at
http://cern.ch/harp-cdp/FinalReportOfRBH.pdf

Subsequently, again at the request of CERN and INFN, the CERN–SPSC compared physics results from the analyses of the HARP–CDP group and the HARP Collaboration,

and quantified the differences noted by the RBH.

The final SPSC report on this quantitative comparison of analyses of the HARP–CDP group and the HARP Collaboration was issued in December 2007 and is available at *http://cern.ch/harp-cdp/FinalReportOfSPSC.pdf* and as document CERN–SPSC–2009–004 (SPSC–M–768)

10 Excerpts on HARP from minutes of the CERN–SPSC and the CERN–RB

The rise and the fall of the HARP Collaboration is perhaps most succinctly mirrored in the minutes of the CERN–SPSC and the CERN–RB meetings.

Excerpts on HARP in the CERN–SPSC and CERN–RB minutes are available at *http://cern.ch/harp-cdp/SPSC-RB-minutes.pdf*
